44th Annual Sale

SELLING

- 35 Hereford Bulls
- 45 Bred Heifers

**Saturday,
November 28, 2009**

St. Onge Livestock, St. Onge, SD
Sale Time — 11:30 AM

HAWKS HEREFORDS

44th Annual Production Sale

***Saturday,
Nov. 28, 2009***

Sale at 11:30 AM
St. Onge Livestock, St. Onge, SD

**SELLING
35 HEREFORD BULLS
45 BRED HEIFERS**

• Terms and Conditions •

Terms: Cash

- Each bull is property of the last bidder when sold.
- All animals of breeding age are guaranteed breeders. Customary guarantees will apply.
- Health certificates and brand clearances will be available. All cattle will meet requirements to go anywhere.
- The auctioneer will settle all bidding disputes.
- All persons who are attending this sale do so at their own risk. Owners assume no liability, legal or otherwise, for any accidents which may occur.
- If you cannot make the sale, you may send or call in your bidding instructions. Your bids will be handled as directed and in your best interest.

Welcome:

Thank you all for taking the time to browse our catalog and/or attend our sale. We appreciate you!

Can South Dakota have its extremes or WHAT! Hopefully our weather will straighten out before winter begins.

We have been looking forward to this sale for some time. I am glad these Herefords can adapt because boy they need too. I'm excited about this set of bulls with two of the breed's best AI sires. We started supplementing later than normal because their pasture looked better than it was. We used ground oats and corn. I am teaching them to eat cake and ear corn as well. They are still in the summer pasture and have to go out and graze for their roughage. I'm confident this will ensure their future soundness.

Can't close out this letter without a granddaughter story. Our little Makenna, who is 18 months old, likes to play with her plastic Hereford cow even though it does say "made in China"! She is a doll.

God bless everyone.
Ed and Gloria

We have used this breed leader for three years by AI. He has had 1,185 calves with a birth ratio of 95. 239 daughters with a weaning ratio of 103. We are pleased with his daughters. They keep in good condition with nice udders. They look like their mature size will be smaller than you would expect from a sire with a high YW EPD.
