WHERE
COWMEN
BUY
BULLS

Welcome...

Welcome to our 2011 sale. Efficiency and hybrid vigor are important traits and whatever your cowherd is I think you will find a great representation of the Hereford advantage here. We are extremely pleased to bring these cattle to you and feel there is value in them for you. I think you will find a herd that has been bred and bulls developed with you in mind. Corn has left our vocabulary and we have decided to feed up what we had left these last five weeks. It is the first corn they have seen this year. These cattle have had to prove they could succeed in this environment as the extra feed you might justify hasn't been available to them the last ten years. Our labor force has shrunk and they are more survivors than ever before. We have jumped into timed AI so if these cattle seemed bunched they are. The udder improvement in 295, 461, and 763 is refreshing. This set of heifers is raising big calves so the milk is there. The contributions of these last two sets of two year olds sends us a message that this cowherd is ready to take a big step and I am really pleased with the last three bulls we added.

We have tried to bring bulls with balanced carcass traits while keeping the growth and birth weight acceptable. These cattle are calving easy right now and I think this is the biggest selection of low BW cattle we have had for a while. Thanks to the innovative mind of Scott Keith, Steve Paisly and the Sarec staff we were able to try to measure our feed efficiency in the WHA test and were tickled with the results. A new herd sire, B Excel 20, will be added from that test as he represents our herd history and until we find one like him he had better stay here. Our cattle are limit fed and nobody gets all they want to eat unless it is grazing. The performance here is as real as we can make it and we need to know. I hope these cattle move well to your home. We stand behind these cattle so let us know. It is the way we like to buy them. We will cooperate on delivery and we have females of all ages for sale.

The biggest thing is the new feature of 11 fall bulls. We had a bull go down two summers ago and left me with 18 open cows in one pasture. I panicked, turned out 19T, the cover bull, and they calved in a little over a month. Some of our heavy hitters were in that bunch and the quality of these young bulls is not to be overlooked. They should have a great future ahead and they have been developed quite practically. It is really neat to see a sire group like that. I think you can really help yourself here. Jessie claims we should calve them all in July. Any bull in this group can be registered at cost.

This year has passed in a flash. I really could have used more rain but the timing was perfect and we have had a great year. These were a powerful set of calves a year ago and they have delivered. The family is well with both Grandmas doing great and everybody growing up too fast. Yes, Ben escaped to college and rooms with Stacia. Congratulations to Mrs. Robin Defoe (Jessie) for getting the ag in the classroom director position and is now married. Amy has gone to WSU for vet school and is going to have to educate most of them about eating red meat and being a conservative. Janice teaches tirelessly and has helped many kids conquer a fear of math and given us all health insurance. We do it cause we love it, thanks for coming!

Cheyenne has several good motels:

Little America **307/775-8400**

Super 8 **307/635-8741**

Holiday Inn **307/638-4466**

When I was given the opportunity to use this bull AI I jumped on it. We had two outstanding yearling heifers by him and this is a breed leading carcass bull! These numbers are off the charts and there are 500 calves by him already. We used him a third time this year so these calves are not a one shot deal. 7 SONS.

We just put in our fourth calf crop and as you go through the pasture both bull and heifer calves demand your attention. Outstanding carcass and growth numbers. He sires long bodied short marked cattle with pigment. His dam is a herd bull mother and his sire easily dominates marbling in the breed. The way he was bred he should have been great and he is. 7 SONS.

This bull has brought a fresh pedigree and old proven sire (King Ten) to our herd. He is backed by a great Lowell Fisher cow and that program. Used in four herds he already has credible data after two calf crops. The heifers are predictably fabulous and there are sons in this offering that demand a second look. Balance in every trait with good marbling numbers. He was used successfully on heifers AI two years by us. 9 SONS.

This bull is still the low birth weight champ of our line up. Jumping three pounds below breed average on BW is a huge feat and to have cattle that still perform. Recommended for heifer bulls. Milk and marbling numbers are high and the first daughter have great udders. 7 SONS.

This bull had me from hello with his easy manners. It might take two horses to move if he thinks his cows have gone far enough or you can walk up, halter him, and lead him to the trailer at the end of the season. All three sons from this flush were used on heifers, one by his breeder, and his dam was kept until she was 15. We use him with confidence to follow 763 and with the way he is bred the numbers coming out of Canada are stronger than listed. Sire of all fall bulls.

This is the most outstanding bull we have raised for some time. He has incredible muscle expression through the stifle, quarter; and down his top. He is heavy boned, correct and travels smoothly. He has one big red eye and is certainly a herd bull prospect. He was collected and has been bred to several cows this year. His mother is a proven producer at age thirteen (and still here) with an exceptional udder. We flushed his full sister for Paul Laubach this spring and another full sister was shown successfully by Jessie and was a Supreme Female Champion at the Laramie County Fair in 2005. At the Sarec Test this bull was -4 for feed efficiency, had an average daily gain of 3.43 and dry matter conversion was 4.99 per pound on a high roughage ration. What more do you want your Herefords to do? This bull's pedigree is our herd's history and this is why we are so excited about his results on the efficiency test.

This bull has full pigment and lots of frame as a Ram son. He is bred for calving ease, but he is a standout for performance. This bull has stretch to breed extra pounds. A little bigger and stouter, this lot is still a great heifer bull candidate. When I find the Ram calves, they are usually up wanting to nurse.

Same cow family as the 8 and 9 twins, so you know the maternal side of this pedigree is going to be very strong with great udders. He looks to pack all the punch that the rest of the Rancher sons do. He stands on plenty of bone and is certainly made rugged enough. Full pigment, don't miss him. Marbling top 15%.

This bull is the leader of the pack. He has the highest WI at 119, highest YI at 114. He has a nice, big pair of big brown eyes, rugged and stands on lots of timber. He has a strong breedy head and should be an easy favorite. A sister is my favorite 295 daughter and his dam is consistently an outstanding producer. It is all here.

He is the most moderate but yet exciting of the Churchill Rancher sons. The dam is absolutely a fantastic producer. He has WI 105, YI 107. This bull has full pigment, is smooth made and heavy muscled all the way through. His carcass numbers are awesome. We will retain one full quarter interest in this bull.

Maternal sister, sired by 763, to Lot 50 with her 2011 bull calf.

What a great mating for the start of a curve bender. Top ten percent birth weight, and all this growth. Nice big red right eye. He is the youngest bull in the sale.

What a great way to start these fall calves. This lot has full pigment and plenty of red meat in him. Moderate in size he flexes when he walks. All these bulls were extremely small and born three miles from home and got it done. The maternal background is every bit as good as the numbers.

This bull may be as good as any of the big ones. He has shape and credentials to be a great baldy maker. You are going to see a lot of live calves and exceptional replacements out of this one. The udders come no better. He is a meat wagon with full pigment.
