

— FALL CALVING COWS —

These fall cows came about when a bull quit working two summers ago. The cleanup bull gave us all our calves in one heat. I culled the older cows and kept this group which is a very high milk, productive set of cows all bred to GH Adams Northern Yank ET 230U (42965713) for 30 days starting October 15.

An own L18, this cow could arguably have the best phenotype on the ranch. Shown successfully by us. Brother was the third best bull on efficiency and gain at Sarec test last year. Dam is here at thirteen years and we flushed her full sister for Paul Laubach in Oklahoma last spring. Selling semen on a full brother.

Youngest bred heifer out of our best cow family. Her dam is a sister to our new sire, B Excel 20.

— FALL OPEN HEIFERS —

These fall heifers are extremely strong maternally and we have decided to sell them and stay in our spring program. Most of these heifers are top 10% or better for milk.
